Delivering Creativity in and out of School

The Garage is an experienced provider of creative education and training packages for schools, youth groups and other agencies across the region. Our creative packages are aimed at 8-25 year olds and range from half-day masterclasses to after-school clubs, and even events the whole community can get involved in.

Activities are designed to enthuse and excite by giving young people a taste for participating in creative activity whilst developing transferable skills. Our team are experts in working with young people, particularly those who, for whatever reason, find it more difficult to engage.

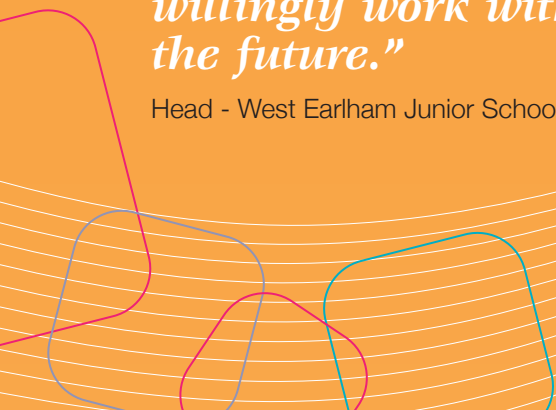

Our aim is to take away all the hassle of managing your activity; we contract professional associate artists, complete risk assessments, gather evaluation and feedback information for you when we are finished. We can even embed nationally recognised Arts Award accreditations into projects if you wish. All you need to do is provide the young people!
